

Introduction

The products on this registered product list have been tested in accordance with IS EN 14511- (1,2,3,4):2007 (Air conditioners, liquid chilling packages and heat pumps with electrically driven compressors for space heating and cooling – Part 1: Terms and definitions, Part 2: Test conditions, Part 3: Test methods, Part 4: Requirements).

In addition they comply with the Electromagnetic Compatibility (EMC): 89/336/EEC, Low Voltage Directive (LVD): 73/23/EEC, 93/68/EEC, Pressure Equipment Directive (PED): 97/23/EC § 3.3. They are assumed to be proper materials for the purpose of Part L of the Building Regulations.

However, it should be noted that the dwelling as a whole, incorporating these products, must comply with all Parts of the Building Regulations. Third party certification bodies e.g. NSAI/IAB are available to assess compliance with all parts of the Building Regulations.

When choosing and installing these products in a particular dwelling, necessary maintenance and access for repair or replacement should be fully considered.

Qualified installers may include SEAI registered installers, FAS trained plumbers who have completed the renewable technologies module or similar.
