

Introduction

The products on this registered product list have been tested in accordance with IS EN 303-5:1999 (Heating boilers. Heating boilers with forced draught burners. Heating boilers for solid fuels, hand and automatically fired, nominal heat output of up to 300 kW. Terminology, requirements, testing and marking). In addition they comply with the Low Voltage Directive (TH 42075; Directive 73/23/EEC) and the Machinery Directive (TH 42073; Directive 98/37/EC).

They are assumed to be proper materials for the purpose of Part L of the Building Regulations.

However, it should be noted that the dwelling as a whole, incorporating these products, must comply with all Parts of the Building Regulations. Third party certification bodies e.g. NSAI/IAB are available to assess compliance with all parts of the Building Regulations.

When choosing and installing these products in a particular dwelling, necessary maintenance and access for repair or replacement should be fully considered.

Qualified installers may include SEAI registered installers, FAS trained plumbers who have completed the renewable technologies module or similar.
