

## **Introduction**

The products on this registered product list have been tested in accordance with IS EN 14785:2006 (Residential space heating appliances fired by wood pellets - Requirements and test methods). In addition they comply with the Low Voltage Directive (TH 42075; Directive 73/23/EEC) and the Machinery Directive (TH 42073; Directive 98/37/EC).

They are assumed to be proper materials for the purpose of Part L of the Building Regulations.

However, it should be noted that the dwelling as a whole, incorporating these products, must comply with all Parts of the Building Regulations. Issues of particular relevance where wood pellet stoves are used may include: flue arrangements, air supply etc Third party certification bodies e.g. NSAI/IAB are available to assess compliance with all parts of the Building Regulations.

When choosing and installing these products in a particular dwelling, necessary maintenance and access for repair or replacement should be fully considered.

Qualified installers may include SEAI registered installers, FAS trained plumbers who have completed the renewable technologies module or similar.

Stove Type : RH = Room heating only / BB = With built in back boiler
