- 1 CO<sub>2</sub>, Carbon Dioxide, is a gas made up of carbon + oxygen.
- 2 A lot of human activity produces CO<sub>2</sub>.
- 3 CO<sub>2</sub> is the main greenhouse gas.
- 4 Greenhouse gases in the atmosphere allow the heat of the sun in, but not out.
- 5 The greenhouse effect is causing a change in our climate.
- 6 Warmer temperatures could cause ice caps to melt, more storms, floods, droughts and more rainfall.
- 7 No one can predict for sure...
