

Declaration of Commitment

We wish to declare our ongoing commitment to an energy management programme of excellence in Chorus. We intend to invest in and support an energy initiative driven by personnel from all departments. We are committed to responsible energy management and will practise energy efficiency throughout our premises, plant and equipment, wherever is cost-effective.

We are willing to increase our awareness of how our energy use patterns impact on our global environment.

We will play our parts in maintaining good energy use habits and eliminating bad energy use habits. We will be involved and assist in 'best practise' regarding our energy use. We welcome all support so that, as a unit together, we can save energy and contribute to saving our environment.

Senior Management Team,
Chorus.
