

Removal of Fossil Fuel Products from ACA

For products procured from 1st January 2022, equipment directly operated by fossil fuels will no longer be eligible for the ACA scheme for energy efficient equipment.

This change is in line with wider Government policy of reducing reliance on fossil fuels and net zero emissions by 2050.

During December 2021 preparation works for this removal will mean that fossil fuel products registered with SEAI cannot be displayed when searching under ACA in the Triple E register.

Throughout this period, please access information on this product type in the tables below:

- Boilers and Hot Water Heaters
- Commercial Combination Ovens
- Local Steam Generators

If you require assistance accessing this product type during the works, or information on this change, please contact triplee@seai.ie

Boilers and Hot Water Heaters
