# seai ENERGY SHOW

The SEAI Energy Show, now in operation for over twenty years, is the only multidiscipline all-inclusive business to business event for the energy industry in Ireland.

The Energy Show offers an exhibition, free expert seminars, technology demonstrations and multiple networking opportunities for visitors in the market for energy saving solutions. Last year, in addition to attendance growing by 17%, over €85 million in revenue sales was generated by exhibitors at the Energy Show.

With organisations once again focussed on sustainable energy improvements as their business strengthens, the Energy Show 2018 is set for even further growth. The SEAI Energy Show is the ideal place to do business, learn and network within your industry.

## Invitation to Participate

Clean energy is vital for the health and wellbeing of our country and for future generations. We are on a transition towards a sustainable energy future that will bring societal and environmental benefits, as well as significant economic advantages.

Government commitment to this transition is clear. In 2018, over €150 million will be invested through SEAI programmes in sustainable energy projects. This will save over 120,000 tonnes in carbon emissions every year, supporting around 3,500 mainly rural jobs and reduce our dependence on expensive imported fossil fuels. This means a commitment to thousands of actions, in thousands of homes and businesses across the country.

As the broader economy improves, businesses are increasingly aware of the benefits of the sustainable agenda in achieving energy efficiencies, reducing their corporate environmental impact and making themselves more resilient in an uncertain future. Businesses are now making informed decisions that can have an immediate and lasting impact, and this creates a lot of opportunity in the Irish economy

Many of those decisions are made at the SEAI Energy Show, with attendee research estimating that €85 million of business orders were made as a result of the 2017 show. This is the key energy event in the Irish calendar bringing together the leading providers in the sustainable energy market, with the more discerning customer, keen to make a difference. If your business has a role to play in the sustainable energy transition, then the SEAI Energy Show is not to be missed. Book your place now.

Jim Gannon  
CEO, Sustainable Energy Authority of Ireland

In 2018, over €150 million will be invested through SEAI programmes in sustainable energy projects

Offices, Retail units, Hotels, Sports and Leisure Centres, Community Centres, Healthcare/ Hospitals, Pharmachem, Food and Agri, Mining, Forestry and Timber, Electronics, Local Authorities, Third Level Institutions, Waste and Water Pumping, Small and Medium Enterprises.

### Energy Suppliers and Providers

Independent Power Producers, Local Authorities, Renewable Energy Developers, State Utilities, Agents and Distributors, Original Equipment Manufacturers.

### Related Interests

Banks and Financial Institutions, Environmental NGOs.

## Who should exhibit?

### Building Service and Technology Providers

Air Conditioning, Air Tightness, District Heating, Insulation, HVAC, Lighting, Heating and Cooling, Monitoring and Targeting, Motors and Drives, Refrigeration, Compressed Air, Process Specialists, Heat Recovery, Ventilation.

### Energy Management Companies

Companies involved in: Consulting, Auditing, Metering, Building Energy Management Systems, Facilities Management, Energy Management Bureaus, ESCOs, Energy Agencies.

### Professional Trade Associations

Professionals including Architects, Engineers, Project Managers, Solar, Wind, Bioenergy, Geothermal and CHP experts. Suppliers - Suppliers, Manufacturers or consultants in the area of PV and Solar Thermal Energy, Wind Energy, Geothermal Energy, Bioenergy.

### Energy Utilities and Suppliers

State Utilities, Gas/Electrical Suppliers, Independent Power producers, Energy Service Companies.

## Here's what our exhibitors had to say...

*The Energy Show is an excellent platform from which we launch new products and services as well as consolidating our relationships with existing customers.*

**- Casey Technology**

*The Energy Show provides a unique opportunity to meet potential and existing clients. This event has a range of visitors and delegates that are perfectly suited to the industry we operate in.*

**- Verde LED**

*We have attended this show since the outset and find it worthwhile particularly from a B2B perspective.*

**- Greenaer Mobility**
