

All energy labels carry the following information:

- Brand name
- Supplier's model number
- Energy efficiency class.

Some, but not all labels, include energy consumption information. It indicates how many kilowatt hours (units of electricity) will be used per year, per hour or per cycle under specified operating conditions. To estimate costs, simply multiply the kWh number by the cost of a unit of electricity (currently around 16c).

Understanding the labelling on

Showers

Brand name or trade mark →

Supplier's model identifier →

Energy efficiency class →

Annual energy consumption in kWh per year. To calculate the kWh running cost, take the total kWh value and multiply by the cost of a unit of electricity →

ENERGI

Brand name: ABC 12345

Supplier's model identifier: ABC 12345

Energy efficiency class: A+

Annual energy consumption: 212 kWh/annum

Other metrics: 10600 L/annum, 7,0 kg, 58dB, 77dB

Brand name: ABC 12345

Supplier's model identifier: XS

Energy efficiency class: A

Indoor sound power level: 15 dB

Annual electricity consumption: 477 kWh/annum, 1.7 GJ/annum

Water heating function: XS

2017 812/2013

The indoor sound power level in dB.
A

The annual electricity consumption in kWh in terms of final energy and/ or the annual fuel consumption in GJ.

The water heating function, including the declared load profile (from 3XS up to XXL)
