

**All energy labels carry the following information:**

- ▶ Brand name
- ▶ Supplier's model number
- ▶ Energy efficiency class.

Some, but not all labels, include energy consumption information. It indicates how many kilowatt hours (units of electricity) will be used per year, per hour or per cycle under specified operating conditions. To estimate costs, simply multiply the kWh number by the cost of a unit of electricity (currently around 16c).

Understanding the labelling on

**Fridges & freezers**

The label should be displayed on the front or on top of the unit in a clearly visible position.

**Brand name or trade mark** →

**Supplier's model identifier** →

**Energy efficiency class** →

**Annual energy consumption in kWh per year. To calculate the kWh running cost, take the total kWh value and multiply by the cost of a unit of electricity** →

ENERGI

Brand name: ABC 12345

Supplier's model identifier: ABC 12345

Energy efficiency class: A+

Annual energy consumption: 212 kWh/annum

Water consumption: 10600 L/annum

Weight: 7,0 kg

Sound power level: 58dB

Sound pressure level: 77dB

2010/1061

Brand name: ABC 12345

Energy efficiency class: A+++

Annual energy consumption: 71 kWh/annum

Storage volume (refrigerator compartments): 290 L

Storage volume (freezer compartments): - L

Sound power level: 38 dB

2010/1060

Sum of the storage volumes of all compartments that do not merit a star rating (i.e. operating temperature > -6 °C).

Sum of the storage volumes of all frozen-food storage compartments that merit a star rating (i.e. operating temperature ≤ -6 °C).

Airborne acoustical noise emissions.
