

**All energy labels carry the following information:**

- Brand name
- Supplier's model number
- Energy efficiency class.

Some, but not all labels, include energy consumption information. It indicates how many kilowatt hours (units of electricity) will be used per year, per hour or per cycle under specified operating conditions. To estimate costs, simply multiply the kWh number by the cost of a unit of electricity (currently around 16c).

**Brand name or trade mark** → Brand name ABC 12345

Supplier's model identifier → ABC 12345

Energy efficiency class → A<sup>+</sup>

Annual energy consumption in kWh per year. To calculate the kWh running cost, take the total kWh value and multiply by the cost of a unit of electricity → 212 kWh/annum

Additional icons: 10600 L/annum, 7,0 kg, ABCDEFG, 58dB, 77dB

Understanding the labelling on

**Washing machines**

Brand name ABC 12345

Energy efficiency class A<sup>+</sup>

Annual energy consumption in kWh/annum: 212

Additional icons: 10600 L/annum, 7,0 kg, ABCDEFG, 58dB, 77dB

 <b>10600</b> L/annum	 <b>7,0</b> kg	 ABCDEFG	 <b>58dB</b>	 <b>77dB</b>
Annual water consumption (AWC) in litres per year.	Maximum capacity in kg, for the standard 60°C cotton programme at full load or the standard 40°C cotton programme at full load (kg).	Spin-drying efficiency class.	Maximum noise during the wash cycle (Db).	Maximum noise during the spin cycle (Db).
