1. Executive Summary

This is the fourth annual report on the energy efficiency performance of public bodies in Ireland. It is set in the context of Ireland's EU and national commitments and wider climate change goals, whereby a target of 33% energy efficiency improvement is to be achieved by all Irish public bodies by 2020.

Energy efficiency continues to be a national imperative with a crucial role to play in Ireland meeting its national and international objectives, and achieving its climate change reduction goals. National energy efficiency efforts are also driven by the need for improved security of energy supply and to deal with fluctuating energy costs. The 2015 energy white paper, Ireland's Transition to a Low Carbon Energy Future, sets out the overall national policy context and emphasises how energy efficiency will be at the centre of a transition to a clean, low carbon energy system by 2050. The strategic importance of public sector energy efficiency is underlined in Ireland's fourth National Energy Efficiency Action Plan (April 2017) and in the first National Mitigation Plan (July 2017). It is also central to the Government's first *Public Sector Energy* Efficiency Strategy – published in January 2017. This report provides the evidence base which underpins that strategy.

Public bodies are required to report annual energy efficiency data to the Sustainable Energy Authority of Ireland (SEAI) which manages the reporting process on behalf of the Department of Communications, Climate Action and Environment (DCCAE)¹. The definition of 'public bodies' in Ireland is broad and includes the civil service, local authorities, non-commercial state bodies/agencies, commercial state bodies and organisations in the health, justice, defence and education sectors.

Approximately 97% of all public bodies are now using the online national energy monitoring and reporting (M&R) system established by SEAI and DCCAE, in addition to 58% of all schools. The monitoring and reporting system provides an important record of how the public sector performed in 2016.

For 2016 there has been a further improvement in the numbers of organisations reporting. However, the data for 2016 suggests that a **progress plateau appears to have been reached** in the period 2015-2016, at around 20% improvement in efficiency. The detailed data in this report for 2016 cannot, however, be compared on a like for like basis to the data for 2015 as the overall number of public bodies and schools reporting changes from year to year.

- For 2016, 346 public bodies were requested to report data to SEAI, of which 336² submitted complete reports by the reporting deadline.
- In addition, 3,735 standalone schools were requested to report data, of which 2,171³ submitted complete reports.

This report comprises an analysis of the data submitted by these organisations on annual energy consumption, energy savings achieved and energy efficiency performance in 2016 against 2020 targets.

Efficiency gains have been achieved through implementation of thousands of diverse projects, ranging from structured energy management, building and facility upgrades, retrofits, changes in transportation, better energy procurement and through behavioural change in organisations.

Current Position

- Reporting by public bodies in Ireland is required under Regulation 5(4) of SI 426 2014. The number of public bodies that are required to report may change each year due to organisational changes in line with government policy and legislation.
- 2 338 public bodies attempted to submit reports but data for two of these was incomplete and is not included in this report.
- An additional 208 schools attempted to submit reports but their data was incomplete and is not included in this report.

Key findings from the analysis of the data reported by 336 public bodies and 2,171 schools for 2016:

- Their combined total primary energy consumption was 9,375 GWh and their total energy spend was €536 million.
- This is estimated to represent 95% of the energy consumption of the sector.
- Annual primary energy savings of 2,336 GWh were achieved, which is equivalent to 520,000 tonnes of CO₂ savings.
- These savings amount to a 20% improvement on business as usual, representing €133 million in cost savings for the sector in 2016.
- The cumulative avoided CO₂ emissions since their baselines amount to 2,683,000 tonnes, while the value of the cumulative energy savings over the same period is €737 million.

While the level of reporting by public sector organisations is very strong in terms of compliance, the aim is that all public bodies' consumption, including that of all schools, will be reported in future years. The compliance rate in 2016 for public bodies was 97%, excluding schools. The compliance rate for schools of 58% is significantly higher than that of last year (48%). It is considered a good response given the technical complexity of the data requirements.

Overall, based on the data reported, the energy efficiency performance achieved for 2016 is good, at 20% improvement. But the plateau now observed underlines the need for intensification of effort – which the new *Public Sector Energy Efficiency Strategy* is designed to provide, from 2017. The annual M&R process is an enabling tool, providing public bodies, their energy performance officers and key stakeholders with the performance information that enables strategic decision-making to facilitate the achievement of the 33% efficiency target.

In 2016, while there were improvements made in the level of reporting, the total energy efficiencies achieved had plateaued at around 20%

In 2016, public bodies avoided €133 million worth of energy consumption

Key Findings

FOR 2016, THE SAVINGS ACHIEVED WERE:

2. Background and Context

2.1 Policy and Legislative Requirements

The Energy Efficiency Directive (EED) (2012/27/EU)⁴ sets out the policy roadmap for the period to 2020 and brings forward legally binding measures to intensify Member States' efforts to use energy more efficiently at all stages of the energy supply chain. The EU 2030 Climate and Energy Framework sets out headline targets for the EU for 2030 of at least a 40% reduction in greenhouse gas emissions (from 1990 levels) and increases in energy efficiency and renewable energy to 27%.

In Ireland, the National Energy Efficiency Action Plan (NEEAP) sets out several obligations on public bodies to lead the way in relation to energy efficiency, stating 'The public sector will improve its energy efficiency by 33% and will be seen to lead by example — showing all sectors what is possible through strong, committed action'. The Public Sector Energy Efficiency Strategy —

approved by Government in December 2016 and published in January 2017 - puts in place a new governance structure, provides further guidance on energy management and enhanced support to help public bodies achieve this target. The strategy also highlights the important leadership role the public sector has on energy efficiency.

SEAI, on behalf of DCCAE, established the M&R system to enable public bodies and schools to track their energy efficiency performance towards the 2020 targets.

This M&R system is based on the groundwork put in place since 2009 by SEAI to enable the public sector to meet its energy efficiency reporting requirements. This is illustrated in Figure 1.

FIG. 1: ENABLING M&R BY PUBLIC BODIES

2.2 The Monitoring and Reporting (M&R) Process

Since 2010, public bodies have been required by Irish statute to report on their energy usage and actions taken to reduce consumption. There are two key obligations for public bodies:

- Requirement under the provisions of SI 426 of 2014 to report energy management and performance data directly to SEAI each year in order to track progress towards the 2020 target.
- ii. Requirement to publish an annual statement on energy performance. This statement must describe 'the actions it is taking, or has taken, to improve its energy efficiency and an assessment of the energy savings arising from those actions'.

The reporting methodology is illustrated below in Figure 2. A more detailed description is in Appendix 1.

There are two key concepts applied:

- a) Application of activity metrics so that fluctuations in an organisation's level of activity that have an impact on energy **consumption** are taken into account in determining performance, and
- b) Tracking energy performance and energy efficiency against a **baseline** so annual improvements can be assessed.

Energy efficiency improvements therefore can be assessed against a 'business as usual' scenario, and take into account organisational or infrastructural changes that impact on the energy requirements of the public body.

2.3 Water Services

Up to the end of 2013, local authorities were responsible for the provision of public water services, which accounted for approximately 40% of their combined energy consumption. The water services sector had made savings of 6% up to and including 2013. In January 2014, the water services assets transferred to Irish Water. In consultation with local authorities and Irish Water, SEAI developed an approach to track the energy performance of the sector before, during and after this transition. Data for local authorities and Irish Water is included within the same sub-sector in this report.

FIG. 2: HOW PUBLIC BODIES REPORT

2.4 Analysis of Reporting by Public Bodies

In Ireland the definition of 'public bodies' is broad and encompasses a wide range of organisations, including the civil service, local authorities, non-commercial state bodies/agencies, commercial state bodies and organisations in the health, justice, defence and education sectors.

In 2016 **346**⁵ **public bodies and 3,735 standalone schools** were requested to report data to SEAI through the 2016 reporting cycle⁶.

The public bodies and schools that were requested to report during the 2016 reporting cycle are broken down as follows:

- 346 public bodies, including 16 Education & Training Boards (ETBs), were requested to report data directly to SEAI using the reporting system. The facilities under the aegis of the ETBs, including 252 schools, were requested to report via their ETBs.
- Another 3,735 schools were requested to report directly as standalone entities.

By the reporting deadline, 338⁷ public bodies and 2,379 standalone schools had made submissions to SEAI. Some of these submissions were not fully complete and are not taken into account in the analysis of the data presented in this report. The data presented in this report is an analysis of 336 complete submissions from public bodies and 2,171 from standalone schools.

The 336 complete submissions made by public bodies represents a compliance rate of 97%. SEAI estimates that the consumption of all of the organisations that reported represents over 95% of total public sector energy consumption.

Figure 3 shows the number of complete reports submitted from each sub-sector as a proportion of the total number of organisations in each sub-sector.

The consumption of the organisations that reported represents 95% of total public sector energy consumption

⁵ The number of public bodies that are required to report in Ireland may change each year due to organisational changes in line with government policy and legislation e.g. in 2015 the National Roads Authority and the Railway Procurement Agency merged to become Transport Infrastructure Ireland.

In addition, a further 3 public bodies and 14 schools were requested to report but were subsequently excused from reporting as standalone entities.

⁷ This figure includes 3rd level institutions and ETBs, but excludes standalone schools.

3. Analysis of Primary Energy Consumption and Energy Spend

The data presented in section 3 is based on the complete reports submitted by 336 public bodies and 2,171 schools⁸.

3.1 Total Energy Consumption

The total primary energy consumption reported for 2016 was 9,375 GWh.

The sectoral breakdown of this total is shown in Figure 4.

FIG. 4: BREAKDOWN OF TOTAL ENERGY CONSUMPTION BY SUB-SECTOR (GWh)

	GWh
Civil Service	414
Commercial State Body	2,255
Education (excl. Schools & ETBs)	863
Health	1,848
Justice & Defence	606
Local Authorities & Water Services	2,318
Non-commercial State Body / State Agency	411
Schools & ETBs	660
Total	9,375

3.2 Total Energy Spend

In 2016 the total public sector energy spend was €536 million.

The sectoral breakdown of this total spend is shown in Figure 5.

FIG. 5: SECTORAL BREAKDOWN OF TOTAL ENERGY SPEND

	€M
Civil Service	22
Commercial State Body	162
Education (excl. Schools & ETBs)	40
Health	90
Justice & Defence	38
Local Authorities & Water Services	129
Non-commercial State Body / State Agency	23
Schools & ETBs	33
Total	536

3.3 Total Energy Consumption by Fuel Type

The breakdown of the 9,375 GWh of energy consumption reported for 2016 between electrical, heating (thermal) and transport is illustrated in Figure 6. The thermal and transport subtotals are broken down by fuel type in Figures 6A and 6B.

FIG. 6: CONSUMPTION SPLIT

	GWh
Electricity	4,909
Thermal	2,349
Transport	2,117
Total	9,375

FIG. 6A: THERMAL ENERGY BREAKDOWN

	GWh	%
Natural Gas, LPG & Biogas	1,747	75%
Heating Oils	569	24%
Wood Fuels	33	1%
Total	2,349	100%

FIG. 6B: TRANSPORT ENERGY BREAKDOWN

	GWh	%
Road Diesel	1,699	80%
Marked Diesel (Non-thermal)	158	8%
• Petrol	19	1%
Biofuels	52	2%
Other Transport Fuels	189	9%
Total	2,117	100%

The consumption patterns in the sub-sectors are illustrated in Figure 7.

FIG. 7: BREAKDOWN OF PRIMARY ENERGY CONSUMPTION BY SUB-SECTOR (GWH)

	Electricity GWh	Thermal GWh	Transport GWh
Civil Service	266	110	39
Commercial State Body	631	160	1,463
Education (excl. Schools & ETBs)	517	340	6
Health	831	938	79
Justice & Defence	221	150	235
Local Authorities & Water Services	1,827	259	233
Non-commercial State Body / State Agency	272	78	61
Schools & ETBs	344	315	2
Total	4,909	2,349	2,117

3.4 Electricity Consumption

The total electricity consumption is 4,909 GWh and is broken down in Figure 8.

FIG. 8: BREAKDOWN OF ELECTRICITY CONSUMPTION

	GWh
Office Buildings	714
Education Buildings	799
Healthcare Buildings	818
Other Buildings	498
Water Services	891
Public Lighting	472
Waste & Other Processing	73
Transport	185
• Other	154
Unknown	304
Total	4,909

3.5 Natural Gas Consumption

The total natural gas consumption is 1,656 GWh and is broken down in Figure 9.

FIG. 9: BREAKDOWN OF GAS CONSUMPTION

	GWh
Office Buildings	195
Education Buildings	411
Healthcare Buildings	579
Other Buildings	290
Water Services	10
Waste & Other Processing	17
Electricity Generation	21
• Other	42
Unknown	91
Total	1,656

10 public bodies account for 48% of total consumption

3.6 Main Energy Consumers

Altogether, the total primary energy consumption in 2016 of the ten largest energy consumers was 4,460 GWh, which accounts for 48% of total reported consumption. The 100 largest energy consumers that reported account for 87% of the total reported primary energy consumption.

FIG. 10: BREAKDOWN OF MAIN ENERGY CONSUMERS

	GWh
• Top 10	4,460
• Top 25	5,915
• Top 50	7,089
• Top 90	8,047
• Top 100	8,190
All public bodies and schools	9,375

It is likely that improvements by the top 50 energy consumers (which account for 76% of energy consumption) will largely determine if the 33% target will be met by the sector by 2020.

The 10 largest energy consumers that reported for 2016 are set out in alphabetical order below.

- An Garda Síochána
- An Post
- Bus Éireann
- daa plc
- Defence Forces
- Dublin Bus
- Dublin City Council
- HSE
- larnród Éireann / Irish Rail
- Irish Water

4. Analysis of Energy Savings Achieved and Performance

4.1 Total Public Sector Primary Energy Savings (GWh) and Performance

The combined savings in 2016 of the public bodies and schools that submitted complete reports is 2,336 GWh⁹ of primary energy, as illustrated in Figure 11. This amount is equivalent to a 20% improvement compared to what the business-as-usual energy consumption would have been had these organisations maintained their baseline efficiency levels¹⁰. This is the primary indicator used for tracking the sector's progress towards the 33% target. Based on 2016 data, a 33% improvement would be equivalent to 3,879 GWh of primary energy savings.

The 2,336 GWh of annual energy savings are equivalent to 520,000 tonnes of annual CO₂ savings.

The cumulative avoided CO₂ emissions (up to 2016) since their baselines reported by the public bodies and schools that submitted complete reports amount to 2,683,000 tonnes.

520,000 tonnes

THE 2,336 GWH OF
ANNUAL ENERGY SAVINGS
ARE EQUIVALENT TO
520,000 TONNES OF
ANNUAL CO₂ SAVINGS

FIG. 11: SOURCES OF ENERGY SAVINGS

	GWh
Civil Service	120
Commercial State Body	748
Education (excl. Schools & ETBs)	316
Health	368
Justice & Defence	82
Local Authorities & Water Services	504
Non-commercial State Body / State Agency	139
Schools & ETBs	58
Total	2,336

⁹ Calculated by subtracting each organisation's actual 2016 energy consumption from its business-as-usual energy consumption. The business-as-usual energy consumption is the amount that each public body would have consumed in 2016 had it not made the reported efficiency gains since its baseline.

¹⁰ The calculation of these results incorporates adjustments to the business-as-usual consumption for local authorities to account for the transition of water services to Irish Water.

The analysis of the performance of the 336 public bodies (excluding standalone schools) that reported shows that:

- 47% are more efficient than their baselines and are on track for their 2020 target. (Aggregate 2016 savings of 1,616 GWh, which is equivalent to 360,000 tonnes of CO₃)
- **40%** are more efficient than their baselines but are not yet on the path to the 2020 target. (Aggregate 2016 savings of 738 GWh, which is equivalent to 164,000 tonnes of CO₂)
- **13%** are less efficient than their baselines. (Aggregate 2016 deterioration in performance of 37 GWh, which is equivalent to 8,000 tonnes of CO₂)

Of the public bodies that reported, **87% have made improvements on their baselines**. Taking both the savings and deteriorations into account, overall improvement for the public bodies is 2,318 GWh. This is equivalent to 516,000 tonnes of CO₃.

The distribution of the performance results is shown in Figure 12.

FIG. 12: OVERALL LEVEL OF IMPROVEMENT ON BASELINE

2016 Performance (all sectors)	No. Public Bodies	No. Stand- alone Schools	Total No.
>40% improvement	42	103	145
30-40% improvement	40	118	158
20-30% improvement	89	237	326
10-20% improvement	73	345	418
0-10% improvement	47	425	472
Deterioration in performance	45	943	988
Total	336	2,171	2,507

The graph in Figure 13 tracks how the total savings achieved in each year since 2009 compare to the 2020 target.

FIG. 13: ANNUAL PRIMARY ENERGY SAVINGS

Year	Saving
	GWh
2009	524
2010	563
2011	1,134
2012	1,262
2013	1,641
2014	2,013
2015	2,353
2016	2,336

In addition to the energy efficiency improvements achieved, the absolute level of energy consumption has reduced over time. The 336 public bodies and 2,171 schools that reported data consumed **801 GWh** less primary energy in 2016 than they did in their baselines.

4.2 Analysis of Total and Cumulative Public Sector Energy Savings (€)

The value of the **energy savings** reported for 2016 is **€133 million**. As the total spend in 2016 for all of the organisations that reported data is €536 million, this represents a saving of 20% in energy costs attributable to energy efficiency improvements.

The value of the cumulative energy savings (up to 2016) since their baselines reported by the public bodies and schools that submitted complete reports is €737 million.

THE CUMULATIVE SAVINGS
SINCE BASELINES
FROM PUBLIC BODIES
AND SCHOOLS

4.3 Sub-sector Primary Energy Savings (GWh)

The breakdown of savings in primary energy (GWh) and percentage improvement on 'business as usual' (BAU) by sub-sector is set out in the table in Figure 14. The equivalent CO, savings are also identified.

The bar chart in Figure 14 illustrates percentage savings for each sub-sector.

FIG. 14: SUB SECTOR COMPARISON OF PERFORMANCE TO DATE (PRIMARY ENERGY SAVINGS)

Sub-sector	2016 Energy Savings (Primary)		CO ₂ Savings
	GWh	% Improvement on BAU	Tonnes (000s)
Civil Service	120	22%	26
Commercial State Body	748	25%	173
Education (excl. Schools and ETBs)	316	27%	68
Health	368	17%	79
Justice & Defence	82	12%	19
Local Authorities & Water Services	504	20%	112
Non- commercial State Body / State Agency	139	25%	30
Schools& ETBs	58	6%	13
Total	2,336	20%	520

BAU: business as usual

Making Progress

The reports submitted this year demonstrate energy efficiency improvements achieved through the implementation of thousands of individual efficiency measures as part of an overall drive for energy efficiency by public sector organisations. Over half of the measures reported addressed lighting, heating, building fabric and structured energy management improvements. Other areas targeted were ICT systems, water services, on-site renewables and transport.

The projects illustrated on these pages are a selection of the **3,123 projects** and measures that the public sector has reported to SEAI in 2016 and are representative of the diverse range of energy efficiency improvements which have been implemented across the country. While the overall level of project reporting has improved, many of the efficiency measures are individually of a small scale. Organisations will need to become more proactive in both undertaking energy efficiency projects of scale, and reporting on them, so that other public bodies can benefit from their experience.

Note: Case study savings are total final consumption, all other figures in the report are primary energy consumption

1,000,000 kWh

Following the opening of the 5 MW landfill gas utilisation plant at Drehid, County Kildare in 2014, an opportunity was identified to increase the efficiency of how the landfill gas is used to generate electricity. An innovative landfill gas cleaning system was installed in 2015 which has significantly reduced the downtime required to clean the engine, by tackling the impurities carried in the gas. The plant can now capture and combust more of the landfill gas, with less flaring, making the electricity production process more efficient. The impact of this efficiency has been measured as an improvement of more than 1,000,000 kWh annually.

The Drehid plant can now produce 5.6 MW of renewable power from landfill gas - enough to power 8,500 homes.

Bord na Móna

39%

In 2015, Gas Networks Ireland completed replacement work on the fourteen-year-old chillers at its Cork headquarters building, installing two new high-efficiency, air-cooled 130 kW chillers. Works included a new chiller sequencer panel, additional controls and instrumentation to operate the new chillers, balancing the chilled water load and delivering an energy reduction of 39% and savings of 45,500 kWh per annum. This project has reduced annual energy costs by €7,000 and saves 21 tonnes of CO₃ emissions every year.

Gas Networks Ireland

400,000 kWh

Leopardstown Park Hospital upgraded approximately 40% of its buildings, in 2016, by installin 300 mm high density insulation across all roof and attic areas. Not only have these measures increased comfort levels for staff and patients but gas usage has decreased by 303,900 kWh. In conjunction with the insulation works, lighting in high usage areas was upgraded to LED, saving a further 59,600 kWh on electricity usage. The new lights have a lifespan of 50,000 hours, resulting in further savings due to reduced maintenance costs. The hospital received *EcoMerit* certification in September 2016, demonstrating its ongoing commitment to energy saving

Leopardstown Park Hospital

33%

Waterford City and County Council recently completed the first phase of energy efficiency upgrades at City Hall Waterford. The works included the installation of two high-efficiency gas modulating condensing boilers, three variable flow pumps for heat distribution and an air handling unit. A new building energy management system was also installed to provide centralised control of the new heating and ventilation system. Overall, energy consumption has reduced within the building by 33% with significant reductions in electricity and gas consumption.

Waterford City and County Council

ш >**€9,000**

S.O.S. Kilkenny provides services to people with intellectual disabilities at its Callan Road campus. In 2016, it replaced the outdated storage heating system in four of the day care buildings with a district heating system. Piped radiators now supply heat throughout each of the 2,000 m² buildings and thermostats control the zone pump which supplies this heat. Roof insulation was also upgraded as part of the works, reducing heating demand. Overall savings are 17,700 kWh and over €9,000 per year.

S.O.S. Kilkenny

Kilkenny College recently installed three new, highefficiency condensing gas boilers in its dormitory complex. In addition, the school put in place a building management system (BMS) with the objective of remotely controlling and regulating the 10 boiler houses that are scattered throughout the campus. The primary focus of the upgrades was to guarantee the delivery of a more efficient energy generation and management solution. It is estimated that the BMS will achieve a minimum energy reduction of 12% for the school, with budgeted energy savings of 172,500 kWh, worth €8,100 annually.

Kilkenny College

€41,600 OVER 9 MONTHS

As part of a major building refurbishment, the National Gallery has installed a combined heat and power (CHP) unit below the grass courtyard in front of its building. The CHP unit has now experienced both peak summer and winter conditions and the monitored data for the first 9 months shows 756,800 kWh of electricity and 1,173,100 kWh of heat generated, 150 tonnes of carbon saved, and a cost saving of €41,600 (excluding maintenance costs).

wiring controls and plumbing, was €173,000 which will give a simple payback of just over 3 years.

5. Towards 2020

5.1 Sub-sectoral Performance

The analysis of the data reported by 336 public bodies and 2,171 schools shows that the annual energy efficiency savings at 2016 represents an overall efficiency gain of 20%.

Although a 20% efficiency improvement represents a substantial saving, there are significant challenges ahead for public bodies to bridge the gap to the 2020 target.

Figure 15 illustrates the 2016 position of each sub-sector with respect to the target.

A collective effort across all sub-sectors will be required to meet our 2020 obligations. The M&R performance measurement system enables every organisation – regardless of its level of energy consumption – to analyse the gap to target and design strategic interventions in energy efficiency that will have the most significant impact for it.

The public sector organisations that were requested to submit reports are detailed in section 5.3.

FIG. 15: SECTORAL PERFORMANCE AGAINST 2020 NEEAP TARGET

5.2 **Departmental Groups**

The Public Sector Energy Efficiency Strategy established a governance framework for achieving the 33% target based on departmental groups. Each group comprises the relevant Government Department and the bodies under its aegis.

Figure 16 gives an overview of energy use by departmental group, as well as the number of public bodies in each group, their reporting status and the level of efficiency gains made by 2016. The consumption and efficiency data shown represent the **aggregate data for all of the individual** public bodies within each departmental group, including the department itself.

FIG. 16: BREAKDOWN OF SUBMISSIONS BY DEPARTMENTAL GROUP

Departmental Group	2016 Energy Consumption (Primary)	Complete reports	Overall Status (2016)	Energy Savings Since Baseline
	% public sector			%

5.3 Performance of Public Bodies

SEAI recognises that building a complete energy profile for organisations is an iterative process that will take time as public bodies are in a better position to submit improved data each year. This work is ongoing.

SEAI continues to work with public bodies and schools to improve the quality of their data through the provision of quidance materials, training and bespoke support services.

The public bodies and schools are listed as follows:

Public Bodies (Excluding Schools)

The 336¹¹ public bodies that made a complete submission to SEAI by the deadline are alphabetically listed in three groups according to their level of energy consumption, as follows:

- **Group 1:** Energy consumption greater than 50 GWh
 This includes 35 public sector organisations, which
 account for 69% of total reported energy consumption.
- Group 2: Energy consumption between
 5 and 50 GWh

This includes 130 public bodies, which account for 24% of total reported energy consumption.

Group 3: Energy consumption less than or equal to 5 GWh

This includes 171 public bodies, which account for 2% of total reported energy consumption.

Standalone Schools

The 2,171 standalone schools that made complete submissions to SEAI by the deadline, accounting for 5% of total reported energy consumption, are listed alphabetically by county.

Non-reporting Public Bodies

The public bodies that did not report are listed alphabetically.

5.3.3 Non-reporting Public Bodies

The number of public bodies that are required to report in their own right changes from year to year due to organisational changes within the sector. Some smaller organisations that were requested to report for 2016 did not report data in their own right, but their data was reported via 'parent' organisations, while others may no longer come under the definition of a public body, as set out in SI 426 of 2014. Such organisations are not listed here. These organisational changes are the subject of continual review by SEAI.

An Chéim Computer Services Ltd
An Foras Teanga - Foras na Gaeilge
Beaumont Hospital
Grangegorman Development Agency
Irish Bank Resolution Corporation Limited
Irish Greyhound Board / Bord na gCon
New Ross Port Company
Nua Healthcare Services
Professional Development Service for Teachers
St. Angela's College Sligo

Appendix 1 – Reporting Methodology

The key principles of the reporting methodology are:

- Individual public bodies report annually for the previous year. There is a defined reporting window during which public bodies must report and the cycle repeats annually.
- Public bodies report all of their energy consumption for all fuel types (electricity, thermal fuels and transport fuels) at an organisational level.
- Public bodies report baseline data on a once off basis.
- Public bodies then report their energy consumption annually for the previous year.
- For electricity & natural gas, all public bodies have to do is submit their meter numbers once to SEAI (MPRNs & GPRNs) and then validate them annually. SEAI accesses the energy consumption data corresponding to these meter numbers directly from the regulated meter operators (ESB MRSO and Gas Networks Ireland) each year.
- For all non-network connected energy sources (e.g. heating oils, LPG, solid fuels, diesel), public bodies selfreport their consumption subtotals directly to SEAI.
- Each year, public bodies must self-report an activity metric that best corresponds with their energy usage.

The next reporting cycle will commence in November 2017. All public bodies will be required to report their 2017 consumption before the cycle ends in late April 2018; they will also have opportunity to review/edit their previously reported data.

Measuring Energy Savings

In order to quantify energy savings, changes in given parameters that are related to energy use must be measured. The SEAI system uses energy performance indicators (EnPIs) to measure each organisation's energy performance. This enables organisations to determine how efficiently they are using energy because it accounts for changes in the activity level related to the energy use – or 'activity metric' – of each organisation.

Each year, an EnPl is calculated by dividing the organisation's total primary energy requirement (TPER) by an activity metric.

The primary indicator for tracking each organisation's energy savings is the change in the organisation's EnPl each year and is expressed as a percentage savings between a baseline period and the current year (i.e. 2016). This is a workable methodology which accounts for an organisation's energy performance as well as its energy consumption and enables public bodies to determine if energy is being used efficiently or not in accordance with the definitions of 'energy efficiency' and 'energy savings' used by the European Commission.

Baselines

The progress made by an organisation in meeting its 2020 target is measured against a historical baseline. Organisations have a choice of baseline period. Public bodies can choose whichever of the following baseline periods suits them best: 2001-2005 (averaged); 2006-2008 (averaged); 2009 (single year). 2009 is the default baseline for public bodies. Schools can choose any of these baselines, or any single year up to and including 2013 (default).

Data Verification

The validity of submitted data is checked in two ways:

- Automated Data Verification Assessment (DVA), which consists of validation rules built into the reporting software to check for errors when entering inputs.
- DVAs undertaken by SEAI-appointed assessors, which entail assessments of specific aspects of submissions.
 A DVA of a public body's submission consists of direct interaction(s) between an SEAI assessor and the public body to verify that the data submitted falls within certain acceptability criteria.

The purpose of the data verification system is threefold:

- Ensure, insofar as practical, that the data which is submitted is robust and verifiable;
- Provide an incentive for organisations to submit accurate data:
- Provide a means for supporting organisations in improving how they gather and submit M&R data and for providing feedback on the M&R system.

The data verification process on the 2016 data involved an assessment of 19% of public bodies.

For more information on Monitoring and Reporting, visit www.seai.ie/publicsector or contact publicsector@seai.ie

SEAI would like to thank the Meter Registration System Operators of ESB Networks and Gas Networks Ireland for their continued support in providing the data required to measure and monitor energy efficiency.

Appendix 2 – Glossary

Activity Metric

A measure of the activity that a public body undertakes. Ideally, the activity metric should quantify the key activities that affect energy use, e.g. for organisations in which most of the energy consumption is in buildings, good activity metrics are: the total useful floor area that is heated or air conditioned; the number of people that benefit from the energy service provided (e.g. number of employees for office-based organisations, number of students for universities etc.)

Baseline

The period from which an organisation's progress towards the 2020 target is tracked. There are three alternative baselines for public bodies. Public bodies can choose whichever one suits them best: 2001-2005 (averaged); 2006-2008 (averaged); 2009 (single year). 2009 is the default baseline. Schools can choose any of these baselines, or any single year up to and including 2013 (default).

BMS

Building management systems or building energy management systems provide control and monitoring of energy services. With efficient control of energy using plant and equipment, running and maintenance costs can be reduced and comfort levels maintained. Systems can be set up to monitor and report on energy usage, costs and billing.

EnPI

Energy Performance Indicator. (EnPI) is a way of measuring an organisation's energy performance. Each year, an EnPI is calculated by dividing the organisation's total primary energy requirement (TPER) by an activity metric.

GPRN

Gas Point Registration Number is a unique reference number assigned to every gas point on the natural gas network.

MPRN

Meter Point Reference Number is a unique 11-digit number assigned to every single electricity connection and meter in the country.

Public Body

For the purposes of the NEEAP target, public bodies are considered to encompass the Civil Service, commercial and non-commercial State Bodies, State-owned financial institutions, the Defence Forces, An Garda Síochána, Health Service Executive hospitals and other facilities, Local and Regional Authorities, schools and universities.

Thermal Fuels / Thermal Energy

For the purposes of this report, thermal fuels (thermal energy) comprise all solid, liquid and gas fuels used for non-transport purposes. This includes both fossil and renewable fuels used in boilers, space & process heating systems, catering, fuel based electricity generators (on site), CHP and in all plant, equipment & other non-road-mobile vehicles.

TPER

Total Primary Energy Requirement (TPER), or primary energy, is a measure of all of the energy consumed by the organisation, which accounts for the energy that is consumed and/or lost in transformation, transmission and distribution processes. TPER is calculated by applying published conversion factors to each element of the organisation's energy consumption. The conversion factors can vary from year to year and the factor for electricity is typically at least twice the value of those for thermal and transport fuel types.

Conversion factors for each year are available on the SEAI website.

Transport Fuel

For the purposes of this report, transport fuels comprise all liquid fuels used for transport vehicles (road, rail, air, water). This includes both fossil and renewable fuels. The electricity used for transport (rail, electric vehicles) is included within the electricity totals in this report, although an electricity-fortransport subtotal is broken out in Figure 8.
