

SEAI - Electricity and Gas Prices in Ireland

SEAI collects and analyses electricity and gas prices every 6-months, in line with EU Regulation 2016/1952. Statisticians at SEAI calculate the **effective unit price** of energy (the revenue collected for energy delivered, divided by the total quantity of energy delivered) across **different consumption bands**, and then calculate the weighted average price, based on the market-share of each consumption band. Using data available from Eurostat, SEAI ranks the effective unit price paid by Irish consumers, compared to their European counterparts*.

The tables below update the effective electricity and gas energy prices paid by residential and business consumers in Ireland for January – June 2022. The tables below breakdown the effective unit price of energy in each band, the changes in that price over the last 12- and 24-months, Ireland's EU ranking of the price in that band, and the market share of each band.

Note: Domestic electricity customers, including pay as you go customers, received an account credit of €200 between April and June 2022. This rebate is included in the Residential Electricity Prices for S12022. Please see our 2021 report which provides more detail on this price collection. A full 2022 report will be published in 2023.
