

iSBEM Installation Instructions

You need to have Microsoft Access installed on your computer. Both the "full version" and the "front end" of Microsoft Access are suitable to run the tool. Please note the software will not work on Windows 98.

Save **iSBEM_v3.5.b.zip**, **iSBEM_v3.5.b_patch01_offXX.zip** (either **03** or **07** depending on your version of MS Office) and **iSBEM_v3.5.b_patch02.zip** files to a folder of your choice on your hard drive.

1. Once the downloads have completed:
 - a. Right-click **iSBEM_v3.5.b.zip** and select "Extract All..." from the menu.
 - b. Select a destination path for the extract files. We recommend **C:\NCM**
 - c. Select "Extract"
 - d. Next, extract **iSBEM_v3.5.b_patch01_offXX.zip**, and then **iSBEM_v3.5.b_patch02.zip**, in this sequence, following the same process. It is critical to use the same destination path for all three zip file extractions. When asked whether to replace or skip files, select "Replace the files in the destination".
2. **For Office 2002/2003 Users** - To run the tool from windows explorer:
 - a. Double-click **C:\NCM\iSBEM_v3.5.b.mdb** (if the default installation path was not changed) OR
 - b. **selected_path\iSBEM_v3.5.b.mdb** (if you changed the installation path)
3. **For Office 2007 Users** - To run the tool from windows explorer:
 - a. Double-click **C:\NCM\iSBEM_v3.5.b.accdb** (if the default installation path was not changed) OR
 - b. **selected_path\iSBEM_v3.5.b.accdb** (if you changed the installation path)

Important notice for all users of previous versions of iSBEM:

There is a conversion tool included within version v3.5.b This tool is an Access database called **nct_convert_v3.5.b.mdb** If you wish to open previous NCT files created with any previous version, please double-click in **nct_convert_v3.5.b.mdb** and fill the information required in the form to get a new NCT file compatible with **iSBEM_v3.5.b**
