2017 Performance of the Large Industry Energy Network

Each year, members of our network are supported by SEAI to reduce their carbon emissions and energy spend, and report these performance figures to SEAI.

The Network

- 200 network members
- 138,000 people are employed by network members
- 21% of national total primary energy requirement

Energy Performance (Compared to 2016)

- 5.4% energy performance improvement for the network members
- 1,436 GWh reduction in primary energy consumption, at a time of increasing output

Energy Saving Projects

- 255 projects implemented
- 82,700 tonnes estimated CO2 emissions avoided
- €14.5m estimated energy spend avoided

Performance of ISO 50001 certified members

- 76 members...
- ... accounted for 60% of network energy consumption
- 22% energy performance gains
