

Testing hot and cold

Name: Date:

3. What do you think would happen to the temperature of a beaker of tap water if you add an ice-cube?

Our Prediction	
Beaker of tap water	

4. Take the temperature of the water before and after the ice cube is added.

	<u>Before</u> the ice cube is added	After: 1 min	After: 2 mins	After: 3 mins	After: 4 mins
Temperature of water					

Were your predictions correct? What did the experiment tell you?
