

IMPORTANT SAFETY NOTICE

Electrical Safety Notice to the Homeowner

Please read the following carefully
and acknowledge your understanding by signing your name in the space provided

On inspection of the existing electrical installation, e.g. mains tails, distribution boards and earthing and bonding, being utilized by the circuits or a new installation, particularly installation of heating systems, controls, monitoring and lighting, the electrical installation was found not to be in accordance with I.S. 10101 National Rules for Electrical Installations.

SEAI recommend that the electrical installation be inspected by a Registered Electrical Contractor (REC).

Installers are to list details of any issue(s) that have been identified with the electrical installation:

.....
.....

| Installer | Homeowner |
|-------------------------------|--------------------------------|
| Installer number: _____ | |
| Installers Name: _____ | Homeowners Name: _____ |
| Installer signature: _____ | Homeowners signature: _____ |
| Date: _____ | Date: _____ |

Note to homeowner: Please note the above list details issue(s) identified with the existing electrical installation is not an exhaustive list. There could be additional elements of the electrical installation which may need to be remedied before the SEAI home energy upgrade measure can proceed.

Refer to the Health and Safety Authority (HSA) guidance note on Periodic Inspection and Testing of Electrical Installations : https://www.hsa.ie/eng/publications_and_forms/publications/information_sheets/guidance-note_on_periodic_inspection_and_testing_of_electrical_installations.html
