

All energy labels carry the following information:

- Brand name
- Supplier's model number
- Energy efficiency class.

All labels include energy consumption information. It indicates how many kilowatt hours (units of electricity) will be used per year, per hour or per cycle under specified operating conditions. To estimate costs, simply multiply the kWh number by the cost of a unit of electricity (currently around 35c).

Understanding the labelling on

Smartphones & Tablets

Display in proximity to the product, hung on it, or placed in such a way as to be clearly visible and clearly associated to the specific model.

Battery endurance, in hours and minutes per full battery charge.

Repeated free fall reliability class.

Battery endurance, in cycles.

Repairability class.

Ingress protection rating.
