

All energy labels carry the following information:

- Brand name
- Supplier's model number
- Energy efficiency class.

All labels include energy consumption information. It indicates how many kilowatt hours (units of electricity) will be used per year, per hour or per cycle under specified operating conditions. To estimate costs, simply multiply the kWh number by the cost of a unit of electricity (currently around 35c).

Brand name or trade mark

QR codes in the guides are for illustration purposes only

Supplier's model identifier

Energy efficiency class

Annual energy consumption in kWh per year. To calculate the kWh running cost, take the total kWh value and multiply by the cost of a unit of electricity

Understanding the labelling on

Tumble dryers

The label should be displayed on the front or on top of the unit in a visible manner.

Condenser tumble dryers

Non-condenser tumble dryers

QR codes in the guides are for illustration purposes only

Condensation efficiency class.
Note: Applies to condenser tumble dryers

Acoustic airborne noise emission class of the drying cycle of the eco programme in dB(A).

Rated capacity in kg, for the eco programme at full load.

Duration of the eco programme at full load.
