

Financial Supports

SEAI's business grants have helped organisations all over Ireland make significant savings. Once you have implemented good energy management practices, you can start considering energy efficiency upgrades and switching to renewable sources of energy.

Rapid Approval

For common building upgrades measures and offering immediate grant approval. Suitable for small and medium sized investments, typically less than €1m. Rapid approval grants available for the following measures:

- Solar PV
- Solar Thermal
- Design Assistance
- BMS Optimisation
- Pumps
- Heat Pumps
- AHU Upgrades
- Automatic Controls
- Fabric (roof insulation)
- Fabric (wall insulation)

Tailored Supports

For bespoke or larger investments, tailored support grants typically cover 30-40% of eligible costs.

- Support Scheme for Renewable Heat
- Excellence in Energy Efficiency and Design (EXEED)
- Community Energy Grant

Information for small and medium sized businesses

Did You Know...

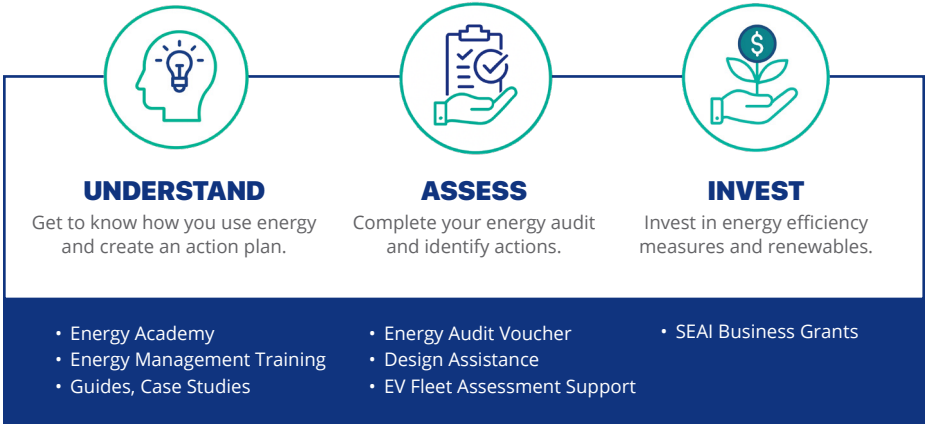

small and medium sized businesses in Ireland spend over €3 billion* annually on energy?

The average SME can potentially reduce their energy bill by approximately 20-30% by implementing energy efficiency measures. Typically, 10% savings can be achieved with little or no capital cost by embedding good energy management practices.

The Sustainable Energy Authority of Ireland (SEAI) has developed a series of educational and financial supports to assist and empower you and your business on your energy saving journey.

Where do I start?

The following three step approach will guide you through the process.

The first step for your business to becoming more energy efficient is to **understand** your energy use and what actions can help you be more energy efficient.

Once your business has implemented a basic energy management and an energy action plan, the next step is to **assess** your energy use by conducting an energy audit.

After embedding good energy management practices within your organisation, you can think about **investing** in energy efficiency upgrades and renewable sources of energy.

It is recommended not to go straight to step three if you do not have a good foundation or understanding of your business's energy use.

Education and Training

SEAI's Energy Academy is a free online training resource for businesses that gives you access to high-quality, on-demand energy training. Discover the skills you need to start your energy efficiency journey. It is an ideal platform for all members of your business to upskill on energy efficiency and a great way of engaging staff.

The online modules and courses are quick and easy to complete and cover topics such as lighting, heating refrigeration, energy efficiency among others as listed below:

Learners will receive a certificate of completion from SEAI which demonstrates a company's commitment to educating staff about energy.

Introduction to Energy Management Training

To help you create an energy action plan SEAI offers Introduction to Energy Management training. This has been specifically developed for small and medium businesses and is particularly relevant to those with little or no prior knowledge of energy terminology, management, or efficiency.

Through this training you will learn how to understand your energy bill, where in your business energy is being used, and what energy saving opportunities you should consider for the future. This training is a great first step on your energy efficiency journey.

To date, SEAI has successfully trained over fifteen hundred businesses across Ireland in Energy Management Training.

Audit Supports

Support Scheme for Energy Audits

An SEAI energy audit is one of the first steps a business can take to save money, save energy, enhance their brand image and future proof their operations. As well as helping you to understand how energy is used in your business, an SEAI energy audit identifies ways in which your business can become more energy efficient and reduce its climate impact. It points out the low and no cost measures that will deliver immediate savings and helps you to plan for longer term investments.

SEAI Support Scheme for Energy Audits (SSEA) will offer SMEs a voucher towards the cost of a high-quality energy audit. In most cases, this will cover the total cost of the audit. Application to the scheme is easy, with automatic approval for eligible businesses.

Did You know? Since the launch of the Support Scheme for Energy audits, SEAI has administered 1000s of high-quality energy audits to small and medium businesses across Ireland.
